EDUCATION

Georgia Institute of Technology
Aug 2024 - Anticipated 2026

- MS, Cybersecurity - Information Security Track

Montgomery College
Jan 2018 - Dec 2019

- AAS, Cybersecurity

University of Maryland
Aug 2013 - May 2017

- BA, Economics

CERTIFICATIONS

- Okta Certified Consultant
- SailPoint Identity Security Professional
- CompTIA Security+
- Jamf Certified Administrator

SKILLS

- Identity Governance
- Identity Threat Protection
- User Lifecycle Management
- Directory Integrations
- Device Trust
- API Access Management
- Integrating Okta with SailPoint
- Zero Trust Network Architecture
- Privileged Access Management
- SaaS Application Management

WORK EXPERIENCE

The Motley Fool

July 2022 - Present

Lead Cybersecurity IAM/IGA Engineer

- Leading identity governance with SailPoint IdentityNow through approval procedures, certification campaigns, role based access controls, and separation of duties policies driving enterprise productivity by eliminating manual work across multiple teams and enabling app owners to securely grant or revoke access without involving IT.
- Detecting and remediating identity threats with Okta Identity Threat Protection with AI, SentinelOne Singularity Platform with Purple AI, and on call rotation with Expel MDR.
- Spearheading migration to Zscaler Private Access by re-architecting to zero trust access controls for private applications, servers, SQL databases, and AWS services.
- Discovering, alerting, and remediating vulnerabilities with Axonius SaaS management platform to audit and reduce overall risk to ensure compliance.
- Migrating and deploying SecOps infrastructure to AWS through Terraform IaC.
- Introducing Okta privileged access for entitlement analysis, server account lifecycle management, vaulting of local server account passwords, SSH/RDP access with ephemeral certificates, and session recording through Okta access gateways.
- Innovating with Aglide founders to help enhance their agentic SSO platform to manage access to apps that don't support standard protocols through Okta's conditional access policies and Aglide's password rotations all while hiding the credential from the browser.
- Deploying Okta FastPass, a phishing-resistant authenticator that detects and prevents the disclosure of sensitive authentication data to fake applications or websites, and enabling passwordless logins through biometrics verification on managed devices.

Systems Administrator

October 2019 - June 2022

- Enterprise admin for SaaS apps (Okta, Office 365, Google Workspace, 1Password, etc), responsible for SSO setups, profile mappings, user lifecycle management, and group pushing from Okta to downstream apps.
- Supported Jamf / Kandji (Mac) & SCCM/Intune (Windows) environments with app and OS deployments / patching.
- Architected out-of-box experience for devices through use of Jamf Connect / Kandji Passport and Microsoft Autopilot phasing out legacy imaging procedures to reduce workload during sudden shift to remote workforce due to the pandemic.
- Optimized the company's support systems for every day use with automation platforms (Okta Workflows, Workato, Zapier) and/or scripts (Python, Powershell, JavaScript, Ruby).

IT Support

March 2018 - September 2019

- Provided support for accounts, devices, systems in a hybrid on-premises Active Directory and cloud Azure AD environment.
- Exchange/Office 365 support and administration (creating power shell scripts, shared mailboxes management, distribution lists, etc).
- Ensured all equipment and systems in Zoom-based conference rooms were working ready for every day use and provisioned Zoom cloud phone accounts for employees.

Georgetown University

August 2017 - February 2018

IT Support

- Operated the University Information Services desk to provide in-person bilingual (Spanish) IT support for faculty, staff, and students.
- Delivered support for hardware and software in classrooms and offices on campus.
- Resolved Jamf (Mac) and SCCM (Windows) imaging issues during device upgrades.
